PROFESSIONAL SUMMARY

Results-driven Technical Associate and former Technical Lead with **6+ years of experience** in technical support, LMS/CRM administration, EdTech operations, and cross-functional project management. Proven track record of building automation workflows, optimising batch operations, and leading technical teams in fast-paced product environments. Adept at bridging operations and product teams to deliver scalable, process-driven solutions.

CORE COMPETENCIES

- **Technical Support & Operations:** LMS/CRM Administration, SOP Documentation, Desktop & Application Support, Incident Management, Root-Cause Analysis
- **EdTech & Content Ops:** Batch Management, Lecture & Thumbnail Workflows, Faculty Coordination, Recorded & Live Class Operations, DPP/Test Upload Management
- **Automation & Tools:** Bot-Based Workflow Automation, Process Optimisation, PRD Writing, Feature Requirement Documentation, Batch Cloning Pipelines
- **Project Management:** Agile/Scrum, Cross-functional Stakeholder Management, Sprint Planning, Risk Mitigation, Vendor Coordination
- **Technical Stack:** MS Excel (Advanced), Google Workspace, Jira, Confluence, HTML/CSS Basics, Git, API Integrations, Python (Scripting)

PROFESSIONAL EXPERIENCE

Technical Associate

April 2023 – Present

Xylem Learning Pvt. Ltd., India

- Spearheaded end-to-end **batch operations** for live and recorded classes across multiple exam categories (Govt. Exams, GATE, AE/JE), reducing scheduling errors by 30%.
- Authored and maintained **20+ SOPs** for LMS workflows including lecture uploads, thumbnail generation, batch cloning, and DPP/test management.
- Led **bot-based automation** initiative (Phase 1 & 2), documenting requirement specifications and workflow steps that cut manual processing time by an estimated 40%.
- Defined and enforced thumbnail and lecture title rules across faculties, improving content consistency and reducing rework cycles by 25%.
- Collaborated with the Product team to draft **PRDs and feature proposals**, including data-transfer efficiency improvements between LMS programs, quantifying time savings and mapping stakeholder approval workflows.
- Coordinated with faculty, content, and QA teams to ensure on-time delivery of **300+ lectures/month** with zero compliance violations.
- Managed LMS/CRM data integrity, performing audits and reconciliations to maintain accurate batch records and student enrolment data.

Technical Lead

February 2020 – April 2023

MEDPG, Thrissur, Kerala, India

- Led a team of **5 technical support engineers**, managing daily operations, escalations, and performance reviews for a medical education platform.
- Served as **Project Manager** for platform migration and feature rollout projects, delivering 3 major releases on schedule within a 12-month period.
- Designed and implemented **Level 1 & Level 2 support triage processes**, reducing average ticket resolution time from 48 hours to under 16 hours.
- Maintained uptime and reliability of the LMS platform; coordinated with development teams to resolve critical bugs impacting **10,000+ active learners**.

- Built internal knowledge base and troubleshooting documentation adopted across all support tiers, cutting repeat escalations by 35%.
- Onboarded and trained new technical staff, running structured induction programs that reduced ramp-up time by 2 weeks on average.

EDUCATION

Bachelor of Technology, Computer Science

June 2015 – May 2018

Vidya Academy of Science and Technology, Kerala

Diploma in Computer Engineering

July 2012 – May 2015

St. Mary's Polytechnic College, Palakkad

ADDITIONAL HIGHLIGHTS

- Active contributor to product improvement initiatives — proposed and documented feature enhancements directly adopted into the product roadmap.
- Hands-on experience mapping complex operational data flows and translating them into structured technical requirements for engineering teams.
- Portfolio: viz-digital.github.io/portfolio
